ANNOUNCEMENT

International Course on Laboratory Animal Science
Utrecht, The Netherlands
May 27 Through June 7, 2002

A 2-week intensive course on laboratory animal science will be given by the Department of Laboratory Animal Science, Utrecht, The Netherlands, May 27 through June 2002. This course has been given once a year since 1993.

The objective of this course is to present basic facts and principles that are essential for the humane use and care of animals and for the quality of research.

The contents of the course are in line with recommendations of the Federation of European Laboratory Animal Science Associations (FELASA) regarding the training of the young scientist whose research involves the use of vertebrate animals.

The course may also be of interest for those who intend to set up a similar course at their location. For this purpose, during the course the acquisition of teaching materials can be discussed with the course committee.

For more in-depth information on specific topics there is an option for participating in one of the following modules:

- Genetic monitoring
- Nutrition
- Anaesthesiology Microsurgery
- Primatology

Each of these modules will take 2 days (microsurgery 3 days). The modules will be organized directly after the 2-week course (Monday and Tuesday, June 10 and 11).
